

## **CATEGORY: BEST GREEN HOUSE GAS REDUCTION PROJECT**

**Description: This category assesses a company's effort to reduce their carbon foot print and greenhouse gas emissions through energy efficiency initiatives or renewable energy projects.**

This category will be judged in two (2) groups:-

1. Projects implemented within Trinidad and Tobago.
2. International projects executed by Trinidad and Tobago registered companies.

### ***Impact (30 marks)***

Provide details of the project, illustrating how GHG emission reduction was reduced as a result of the project with a focus on the following:-

- State the base line emissions or energy usage.
- Percentage change of emissions after the project was completed.

### ***Monitoring and Evaluation (30 marks)***

How do you monitor the effectiveness of your project and what final evaluation is used to measure success of intended outcomes?

### ***Behaviour Change (15 marks)***

How has your project led to a change in your employees' or other stakeholders' behaviour?

### ***Sustainability (15 marks)***

How do you ensure that the gains from the project will continue beyond the life of the project?

### ***Engagement (10 marks)***

How are your employees and stakeholders involved in your initiative?
